1 - This tool applies to the application portion of the loan only for the purposes of calculating potential loan amounts and is based on information available on January 11, 2021. This information is not considered legal or accounting advice - SEE ACCEPTANCE OF TERMS BELOW. Providing an accurate calculation of payroll costs and eligible borrowed amounts are the sole responsibility of the applicant/borrower. Detailed guidance on calculating eligible PPP borrowing amounts and detailed program information can be found at:

2 - Per SBA guidance, your maximum loan amount estimate is equal to your average monthly payroll costs incurred during the year prior to the loan date multiplied by 2.5 plus the outstanding amount of an EIDL made between January 31, 2020 and April 30, 2020 that you seek to refinance. The data you enter into this template should represent the total costs incurred by your company for each expense category over the full 12-month period ending on either: (i) December 31, 2019; or (ii) December 31, 2020. PPP loans approved in 2020 used 2019 or the 1-year before the date on which the loan is made to calculate payroll costs for purposes of calculating the maximum loan amount. Borrowers who apply for PPP loans 2021 and who are not self-employed are also permitted to use the precise 1-year period before the date on which the loan is made to calculate payroll costs if they choose not to use 2019 or 2020. Please keep the time period consistent across the sections of this template.

3 - 1099-MISC employees are considered to be contract employees and will apply individually for PPP. PPP Applications will be initiated by each individual contract employee.
